

Training Costs to Schools

From 1st September 2019

Travelling to schools can be very costly, both in terms of time and to the environment. In order to keep down our costs to you, our customers, and also to the environment in terms of the amount of CO₂ emitted by our cars, we are introducing a cost to deliver onsite training.

By introducing this cost, we will reduce costs through not having to employ additional staff, keeping down our prices. We will also make a donation of 5% of the amount charged to an environmental tree-planting charity. This will offset approximately 25 times the amount of CO₂ produced by the journey
